Varmvalsede stålplater med en tykkelse på 3 mm eller mer

Toleranser på dimensjon og form

Tabell 1 - TYKKELSESTOLERANSER (alle mål i mm)

Nominell tykkelse	Toleranser for nominell tykkelse							
	Klasse A		Klasse B		Klasse C		Klasse D	
	Nedre grense	Øvre grense	Nedre grense	Øvre grense	Nedre grense	Øvre grense	Nedre grense	Øvre grense
≥ 3 < 5	-0,3	0,7	-0,3	0,7	0,0	1,0	-0,5	0,5
≥ 5 < 8	-0,4	0,8	-0,3	0,9	0,0	1,2	-0,6	0,6
≥ 8 < 15	-0,5	0,9	-0,3	1,1	0,0	1,4	-0,7	0,7
≥ 15 < 25	-0,6	1,0	-0,3	1,3	0,0	1,6	-0,8	0,8
≥ 25 < 40	-0,7	1,3	-0,3	1,7	0,0	2,0	-1,0	1,0
≥ 40 < 80	-0,9	1,7	-0,3	2,3	0,0	2,6	-1,3	1,3
≥ 80 < 150	-1,1	2,1	-0,3	2,9	0,0	3,2	-1,6	1,6
≥ 150 ≤ 250	-1,2	2,4	-0,3	3,3	0,0	3,6	-1,8	1,8
≥ 250 ≤ 400	-1,3	3,5	-0,3	4,5	0,0	4,8	-2,4	2,4

Klasse A: nedre grense avhengig av nominell tykkelse.

Klasse B: for fastsatt nedre grense på - 0,3 mm.

Klasse C: nedre grense 0 mm.

Klasse D: for symmetrisk toleranse.

Tabell 2 - BREDDETOLERANSE

(alle mål i mm)

Nominell bredde	Nedre grense	Øvre grense
< 40	0	20
≥ 40 < 150	0	25
≥ 150 ≤ 400	0	30

Tabell 3 - LENGDETOLERANSE (alle mål i mm)

Nominell lengde	Nedre grense	Øvre grense
< 4000	0	20
≥ 4000 < 6000	0	30
≥ 6000 < 8000	0	40
≥ 8000 < 10000	0	50
≥ 10000 < 15000	0	75
≥ 15000 < 20000	0	100

Tabell 4 - PLANHET, Normal planhetstoleranser, klasse N

	Ståltype L		Ståltype H	
Nominell tykkelse	Målelengde			
	1000	2000	1000	2000
≥ 3 < 5	9	14	12	17
≥ 5 < 8	8	12	11	15

NORSOK Standard M-120 Edition 5, November 2008

Deviation Note vs MATERIAL DATA SHEET MDS - Y07 Rev.4 November 2008. This note covers products manufactured at both UK Mills in Corby and Hartlepool.

Tata Steel does not manufacture or supply material in accordance with MDS Y07.

However, we confirm that the EN10210 S355NH material, which we supply to Norsk Stål, complies with the requirements of MDS-Y07 except for:

i We do not conduct 10% MT of the weld area.

We understand that it was introduced because of concerns about defects in the weld area. We maintain that it is an inappropriate test for this type of defect because it will only detect OD surface breaking features and the test does not give an indication of depth and therefore cannot discriminate between defects and minor surface imperfections (e.g., roll marks) which are allowed by the specification. The weld seam UT to EN10246-8 with enhanced sensitivity that we perform (U3 compared to U5 for the standard product) is the appropriate test to detect weld area defects.

ii We do not guarantee that the surface shall comply to rust grade A or rust grade B or better according to ISO 8501-1.

Note that EN10210 S355NH is classified as fully killed fine grain steel and is delivered in the normalized rolled condition.

MATERIAL DATA SHEET MDS - Y28 Rev. 3 June 2007		
TYPE OF MATERIAL: Structural Steel		
PRODUCT	STANDARD	GRADE
Welded tubulars (welded hollow sections)	EN 10225	SS355G13+N
SCOPE	This MDS is applicable for high frequency welded (electric resistance or induction) hollow sections up to and including 20 mm thickness. This MDS specifies the selected options in the referred standard and modified requirements which shall supersede the corresponding requirements in the referred standard.	
QUALIFICATIONS	Establishment of WPS, qualification of welding procedures and qualification of welding operators shall be in accordance with the NORSOK standard M-101, "Structural Steel Fabrication". With regard to Charpy impact testing the following modifications to NORSOK standard M-101 shall apply: * test temperature: -40°C * relevant notch positions, e.g.: fusion line (FL), FL+2 mm, FL+5mm * minimum average energy value: 36 J * minimum individual energy value: 26 J * microstructure examination Qualifications shall be carried out for each nominal thickness. Detailed requirements for the qualification of the high frequency welding process (electric resistance or induction) shall be defined and agreed. Base material information, with typical results from chemical composition and mechanical testing, shall be submitted with the bid / be established prior to delivery.	
HEAT TREATMENT/ DELIVERY CONDITION		
CHEMICAL COMPOSITION	Option 6	
TENSILE TESTING		
IMPACT TESTING		
EXTENT TESTING		
SURFACE CONDITION	Option 23 shall apply. The internal weld bead shall be removed.	
NON DESTRUCTIVE TESTING (NDT)	The welded hollow section longitudinal welds shall be subject to 100% volumetric NDT and 10% surface NDT in accordance with the following requirements and acceptance criteria: * For thicknesses 10 mm and below, the volumetric NDT as per section 8.5.3.3 shall apply. * For thicknesses 12 mm and above, option 23 shall apply, but to acceptance criteria U2. * The weld on the welded hollow section shall be subject to 10% magnetic testing (MT) of external surface and be free of any linear indication. In case of any finding, 100% of the section with finding shall be examined. The 10% MT shall be carried out for all thicknesses. The 10% MT shall be carried out on every section. More severe defect tolerances for the structural application of the welded hollow section may be agreed case by case.	
SURFACE PROTECTION	All surfaces shall receive a preliminary protective primer coat. Blast cleaning shall comply with ISO 8501-1 Sa 2 1/2 and the surface shall remain at Sa 2 1/2 until application of the primer. The primer shall consist of 1 coat zinc ethyl silicate primer with 15 microns. Measured on a plane polished steel or glass test plate the DFT shall be maximum 25 microns.

NORSOK Standard M-120 Edition 5, November 2008

Deviation Note vs. MATERIAL DATA SHEET MDS – Y28 Rev.5 November 2008. This note covers products manufactured at both UK Mills in Corby and Hartlepool. Tata Steel supplies against an internal MDS, which is ‘**MDS-Y28 (Tata Modified). Rev03’

Tata Steel does not manufacture or supply material fully in accordance with MDS Y28.

However, we confirm that the EN10225 S355 G13+ N + Y28 Modified** material, which we supply to Norsk Stål, complies with the requirements of MDS-Y07 except for:

- i Weld line charpy impact testing to test temperature of – 20 °C notch position: fusion line (FL) and not -40°C
- ii Sizes up to 139.7mm OD x 4mm thick, 90x90x6.3 mm and 100x100x5.0mm and equivalent rectangles are offered EXCEPT Y: T ratio and Clause 9.2 d
- iii Corby
 - For all thicknesses
 - Weld area UT to EN10246-8 acceptance level U3 shall apply;
 - Weld area Eddy current testing to EN10246-3 using the segment coil technique (Reference: 3.7mm drilled hole).
- iv Hartlepool
 - for thicknesses 10 mm and below, the volumetric NDT as per section 8.5.3.3 shall apply;
 - for thicknesses of 12 mm and above, option 23 shall apply, but to acceptance criteria U2;
- v We do not conduct 10% MT of the weld area.

We understand that it was introduced because of concerns about defects in the weld area. We maintain that it is an inappropriate test for this type of defect because it will only detect OD surface breaking features and the test does not give an indication of depth and therefore cannot discriminate between defects and minor surface imperfections (e.g., roll marks) which are allowed by the specification. The weld seam UT to EN10246-8 with enhanced sensitivity that we perform (U3 compared to U5 for the standard product) is the appropriate test to detect weld area defects.

- vi Tata Steel Tubes will be delivered in a condition suitable for onward application of the surface protection which is to be carried

Note that EN10225 S355 G13 + N (Y28 Modified**) is classified as fully killed fine grain steel and is delivered in the normalised rolled condition.

MATERIAL DATA SHEET MDS - Y30 Rev.5 June 2007			
TYPE OF MATERIAL: Structural steel with documented through thickness properties			
PRODUCT	STANDARD	GRADE	
Plates	EN 10225	S420G2+Q/G2+M	
SCOPE	This MDS specifies the selected options in the referred standard and modified requirements which shall supersede the corresponding requirements in the referred standard.		
QUALIFICATIONS	Base material information, shall be submitted with the bid / be established prior to delivery The documentation of base material shall cover both delivered and PWHT condition and shall include strain ageing tests (see option 12), typical tensile test results for plates and weldability tests according to Annex E (option 18) within each of the following thickness ranges that are relevant for the order: 25 < t ≤ 40mm 40 < t ≤ 63mm 63 < t ≤ 100mm 100 < t ≤ 150mm Other thickness ranges related to same chemistry and manufacturing process may apply. In such cases the thickest material in the range shall be tested. The results from PWHT condition shall also meet the specified requirements. CTOD testing shall be included for weldability testing for t > 40 mm and shall meet a requirement of minimum 0,25 mm in a welded condition, and minimum 0,20 mm in PWHT condition unless lower values have been accepted by the purchaser. CTOD testing for thicknesses below 40 mm may be required on the basis of special design criteria.		
HEAT TREATMENT/ DELIVERY CONDITION			
CHEMICAL COMPOSITION	Option 6 and option 9		
TENSIL TESTING	Mechanical properties given in Table 5b shall be modified as follows: Yield Strenght: 420 - 40 Mpa (all thicknesses) Tensile Strenght: 500-660 Mpa (all thicknesses)		
IMPACT TESTING			
EXTENT OF TESTING	Option 13, Tensile testing and impact testing shall be carried out to the extent specified in the standard, except that each nominal wall thickness shall be tested insted of "the same thickness range".		
SURFACE CONDITION			
SURFACE PROTECTION	All surfaces shall receive a preliminary protective primer coat. Blast cleaning shall compy with ISO 8501-1 Sa 2 1/2 and the surface shall remain at Sa 2 1/2 until application of ther primer. The primer shall consist of 1 coat zinc ethyl silicate primer with 15 microns. Measured on a plane polished steel or glass test plate the DFT shall be maximum 25 microns.

2488S/rustfritt	668	548	484	732	612	548

- 1) På lager. Øvrige nr. leveres fra verk etter avtale.
- 2) Spennvidden **må** være i maskenes lengderetning hvor bæerevnen er størst.
Plateformat oppgis alltid med strekkmetallets lengderetning først.
(f.eks. 2440MLx1220mmMB) eller 100MLx2000mmMB)
Max nedbøyning 1/200 av spennvidde. Eksempel: 2492 med belastning 300Kg/m², for et åpent spenn. Anbefalt spennvidde 668mm : 200 = 3.34mm nedbøyning

Type nr.	Maske størrelse/ åpning mm	Strenger bredde x tykkelse mm	Total høyde mm ca.	Ca. Kg/m ²
2492/stål	60x25	6,1x4,5	11,5	17,0

	D3	22,5	16,88	13,5	11,25	9,64	8,44	7,5	6,75

D1: 100x100

D2: 200x200

D3: 300x300

* Loading is based on max load each (D1)100x100, (D2)200x200 or (D3)300x300

* Based on L/200 or max deflection 10mm. NTJ suggest to use loading with max deflection not bigger than 4mm, but this will give a much bigger reduction for the load!

* 1kN = 100 kg.

* Material/steel quality is S235

* c/c for grating type TR-OSPss is 28,2x101,6mm, and it has serrated cross bar.

* Cells marked whit shades, is not recommended for ordinary use!

IMPORTANT: This calculation is absolutely MAX load's with **safety/breaking factor = 1** and this is to be used as an indication.

We **DO NOT GUARANTEE** the correctness of the results or information given in this table!

H38	Hard, stabilisert

T1	Avkjølt fra varmebehandlingstemperatur og kaldutherdet
T3	Innherdet, hardbearbeidet og kaldutherdet
T4	Innherdet og kaldutherdet
T5	Avkjølt fra varmebehandlingstemperatur og varmeutherdet
T6	Innherdet og varmeutherdet
T8	Innherdet, hardbearbeidet og varmeutherdet
T9	Innherdet, varmeutherdet og hardbearbeidet
T10	Avkjølt fra varmebehandlingstemperatur, varmeutherdet og hardbearbeidet

H angir kaldbearbeidet materiale

1. siffer

H1	Bare kaldbearbeidet
H2	Kaldbearbeidet og delvis tilbakeglødet (anløpt)
H3	Kaldbearbeidet og stabilisert

2. siffer

Reduksjonsgrad siste valsestikk

-2	15-20%
-4	30-35%
-6	55 %
-8	75 %
-9	90 %

METALLISKE MATERIALER - INSPEKSJONSDOKUMENTER NS-EN 10 204 (UTDRAG AV NS-EN 10 204, BEARBEIDET AV NORSK STÅL AS)				
NS-EN 10 204 2. utgave 2005 Referanse	Type dokument Betegnelser	Dokument-type kontroll og prøving	Dokumentinnhold	Dokument gjort gyldig av
Type 2.1	Verksattest		Uten prøvningsresultater Erklæring/bekreftelse om samsvar med bestilling/ordre	Produsenten
Type 2.2	Prøverapport	Kontrolldokumenter basert på ikke-spesifikk kontroll	Med prøvningsresultater Erklæring om samsvar med bestilling/ordre, med angivelse av prøvningsresultater fra ikke-spesifikk kontroll. Kontrollen behøver ikke nødvendigvis gjøres på produkter fra den aktuelle leveransen	Produsenten
Type 3.1	Kontroll- sertifikat 3.1	Kontrolldokumenter basert på spesifikk kontroll	Med prøvningsresultater Erklæring om samsvar med bestilling/ordre, med angivelse av prøvningsresultater fra spesifikk kontroll.	Produsentens autoriserte kontrollrepresentant som er uavhengig av produksjons- avdelingen
Type 3.2	Kontroll- sertifikat 3.2			Produsentens autoriserte kontrollrepresentant som er uavhengig av produksjons- avdelingen, og av enten kjøpers autoriserte kontrollrepresentant eller av kontrollør som er angitt i offentlige forskrifter

Dokumentet overfor erstatter EN 10 204: 1991

Hovedendringene:

- Type 2.3 av den tidligere utgivelsen er fjernet
- Type 3.1 erstatter type 3.1.B av tidligere utgivelse
- Type 3.2 erstatter typene 3.1.A, 3.1.C og kontrollrapport 3.2 av tidligere utgivelse
- Nye definisjoner: "produsenter", "mellomledd", "produktspesifikasjon"
